

Himbil 'Lazy Man'

It is an indoor game. The number and age of the players may vary. It is commonly played by four people.

The game requires some cards. Four different categories (animals, fruits etc..) are decided and the words from these categories are written on four pieces of paper. There must be 16 cards in total. Then, all the cards are folded.

- The cards are put on the floor
- Each player chooses four cards randomly

(If one has four same words, he wins the game and puts his hand on the floor and says 'himbil')

But, if one's words are not the same ;

- He takes a card from a player and gives the different one to another player. This goes on till one of the players achieves to collect the same words from the same category. They try to make a group of the same words.
- If someone completes the group he is to put his hand on the floor and say 'himbil'
- The others put their hands on the winner's hand one by one.
- The first player to put his hand on the floor wins the game.

They take points from first to last one.
